

**CUTTING EDGE TECHNOLOGY**  
Full control at your fingertips

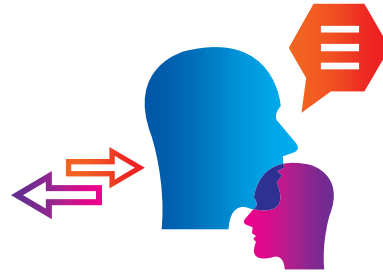

**We are not a reseller we build it for you**  
We customize our solutions to meet your requirements

**“Where innovations take birth”**

Our force lies in the ability to proactively integrate new technologies

R&D is a daily process at Generation Plus Ltd.

### INNOVATION

IOT is the technology of choice for people looking to build intelligent systems to connect, monitor, and control intelligent devices.

*Move to the next level from virtual to acting on physical via Internet. We put you in full control.*

**Put our solutions to the test.**  
Contact us for a free consultation today.

## Control Everything From Anywhere

REDUCE COST THROUGH INTELLIGENT AUTOMATION

Step in IoT and contribute to make our planet green whilst lowering your running costs.

## Automation and Security Services

### Home and Building Automation

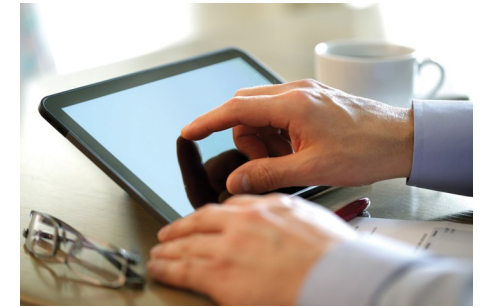

Make your home SMART, control your electrical devices (Lights, Garage Door, Entry Gate, Air Conditioner, TV etc...) Cut down your costs by scheduling events, power off your electrical devices at a predetermined time everyday. Make your lights switch on and off at specific times.

### Hydroponic Production Automation

Alphanium controls the production cycle, through schedulers we automate all the processes (irrigation, extractors, fertilizers, light). The data logging facility records the environmental conditions (Temperature, humidity, etc.), this crucial information gives the conditions that produced good or bad harvests, future environment fine tuning is now possible based on those facts and figures.

### Security

We provide high definition video surveillance system NVR, DVR, HDVR systems, accessible remotely via your internet connected device. Our unique home security alarm system is manageable remotely via internet, your analogue phone line or via GSM. Get notifications and take full control from anywhere.

### FULL CONTROL ON THE GO

Control everything anywhere and be informed as and when events or alarms occur. The only prerequisite is internet connectivity.

## Effective Technologies Engineered by us

Be at the edge of technological advancement and step into IoT. 'Smartify' your home, business, industry.

We engineered 'Alphanium' our IoT products and can customize it as per your requirements.

Alphanium can be interfaced with a wide range of sensors (Temperature, humidity, water level, Carbon monoxide/dioxide, LPG, light intensity. etc..) and control devices (Light, pumps, water valves, entry gates, roller shutters, air conditioners, TV) via Infrared, Radio Frequency or wired connections. Readings from the sensor/s can trigger an action on any device.

## Consultancy Services

### Guidance and advice

We support and guide your in-house staff when there is a need to obtain external and objective guidance, providing impartial advice in a number of technical areas.

### Network

Cabling, VPN, Routers etc...

### Open source based Solution

Enterprise class PBX  
Email Server  
Network Monitoring System  
Firewall  
IDS

### HASSLE FREE MANAGEMENT USING MOBILE DEVICES

Our IoT automation solutions are made simple, a web browser is the only requirement for remote management of our controllers. 'We are platform independent'
